Coyote Eats the Sun

Questions to answer while watching Wenatchee River Institute's "Coyote Eats the Sun" at:
https://youtu.be/C_Oo6QwLAKA

1 What is energy and how does it work?

2 What is matter?

3 How do plants make their own food? Describe how plants make their own food and include a drawing.

4 What is an herbivore?

What herbivores do you see in your neighborhood?

5 What are carnivores and what features might they have?

What carnivores do you see in your neighborhood?

Wenatchee River
INSTITUTE

6

What is carrion and how is it broken down?

7

Have you seen examples of carrion before? If so, where have you seen some and what animals were they?

8

What is decomposition?

9

Track out your way to the sun based on one of your last meals or a meal of your choice.

Next time you go outside and see plants and animals in your neighborhood, think about their role in the web of life.
